THIS IS NOT YOUR TYPICAL DEGRADABLE FILM

EcoMedia was formed to meet the increasing demand of printer's and company's desire to become more environmentally friendly through the use of their medias in print and advertising. We have succeeded in producing items that can match or even exceed competitor's materials in durability, strength, weather resistance, and cost. The ability to go green has been made easier due to EcoMedia's ever evolving product line of printing and advertising medias.

EcoMedia is a woman owned business located in Wisconsin that has taken pride in using vendors and products located and produced in the USA. We listened to customer's requests for products that meet their "green" demands and have given them viable products that meet or exceed their current product.

EcoMedia's goal of being a successful eco-friendly company comes from customers and end users like you who come to us with not only the initiative to become more eco-friendly, but with ideas and questions on how to make the conversions work. We make materials that are not only safer on the environment, but ones that give you a beautiful, printable media at a price that beats the cost of other options. Our films have a proprietary design that is built into the resin as it is being extruded; therefore, the film is as strong as any other film but will only start to deteriorate once it is put into landfill situations.

100% BIODEGRADABLE 100% RECYCLABLE

BLOCKOUT

STRONGER THAN ANY PVC ON THE MARKET TODAY, IT'S ESSENTIALLY TEAR PROOF

- High tensile strength
- Third Party certifiable, compostable by ASTM and ISO
- FDA approved

RESPONSIBLE PACKAGING

Although we produce a "green" product, we're also dedicated to the rest of the color spectrum. Blue skies, brown dirt, and everything in between are always taken into consideration in everything we do, from the boxes our media is shipped in to the booklet you're holding.

- 100% recyclable boxes
- 100% re-usable and recyclable plugs
- 100% biodegradable and recyclable poly bag

Additionally, all scrap created during the production process of EcoMedia is recycled back into the manufacturing of the same or similar material.
