

As innovators of earth friendly plastic products, we are proud of being part of the cutting edge way of combining performance and ecological responsibility with our recycled foam pvc board.

## EnviroGreenBoard

EnviroGreenBoard is the Ultimate solution for "Never Throw away" sign and display substrates. We have developed the ultimate enviro-friendly sign and graphics substrate.

This product features a smooth, 2-sided white clay paper surface and is available in standard 4' x 8' sheets with three nominal thicknesses: 1/8", 3/16", 1/4" and 3/8". This Panel is made to replace alternative foam Boards (made of Paper and foamed Polystyrene core) that are not recyclable. EnviroGreenBoard is made from up to 90% recycled paper with a White Clay paper laminate. Perfect for Digital and screen printing. The Ultra bright white laminates provides a perfect background for any graphic displays.

When your sign or display is ready to be disposed of... simply place in your paper recycling bin. This product has been made specifically to never be dumped into any land fill.

EnviroGreenBoard is warp and dent resistant. Very rigid for unsupported displays. Yet flexible enough to be bent into a curve as small as 6" diameter. Strong, lightweight and economical, Easy-Curve can be bent into irregular "S" curves or rolled into columns as small as 6" in diameter. This recycled paperboard product is ideal for a wide range of applications.

### Recommended Application

- Substrates for Laminating
- Picture Frames, Signs, Display and printing
- Department Store Displays and signage
- Remodeling
- Sign Shops
- Graphic Arts
